Mesopotamia geography worksheet pdf

Ancient Mesopotamia and Sumerians The word Mesopotamia comes from the Greek words, meaning land between rivers. The Tigris and Euphrates Rivers. The first settlers of this region did not speak Greek, only thousands of years later Greek-speaking Alexander the Great, king of Macedonia, seized this land and carried his culture with him. Mesopotamia is considered the cradle, or the beginning of civilization. Here, major cities lined the rivers and there were many advances. Mesopotamia is located in Southwest Asia. There began the first known civilization. Civilization is a group of people who have a high level of culture and order. People in civilization belong to different social classes and do different types of jobs. Civilization has science and art. It also has government, values and beliefs. Mesopotamia at first glance does not look like an ideal place for civilization to flourish. It is hot and very dry. There is very little precipitation in Lower Mesopotamia. However, snow melting in the mountains near the source of these two rivers has created annual flooding. Flooding deposits silt, which is fertile, rich, dirty, on the banks of rivers every year. That's why Mesopotamia is part of the fertile crescent moon, an area of land in the Middle East that is rich in fertile soil and crescent-shaped. Lower Mesopotamia is located in the modern country of Iraq, and Upper Mesopotamia is located in Syria and Turkey. Sumerians were the first to move to Mesopotamia, they created a great civilization. Starting about 5,500 years ago, Sumerians built cities along rivers in Lower Mesopotamia, specialized, collaborated and made a lot of advancement in technology. Wheel, plough and writing (a system we call wedge writing) are examples of their achievements. Villagers in Schumer created levees to contain floodwaters from their fields and cut canals to bring river water to fields. The use of levees and canals is called irrigation, another Sumerian invention. Farmers in Mesopotamia received water from the Tigris and Euphrates rivers. Sometimes, however, it rains too much. This caused the flooding of rivers. Flooding is when water overfills from the river to the ground. Floods could have destroyed crops, but they also left the land covered in silt. Silt - rich soil. This is good for agriculture. Using irrigation, farmers could grow large quantities of food. People of Mesopotamia had extra food, or excess. As a result, not everyone needed agriculture. Some people could become artisans. Artisan is a person who does good, such as cloth, tools or weapons. Soon people began living together in places that helped them trade goods. Soon small villages grew into cities. By 3000 R.C. many cities started and grew up in Schumer. Schumer is a region in southern Mesopotamia. Schumer's civilization, schumer's people were called Sumerians. They built a lot of cities. In the cities of Schumer there were deserts around them. Desert was hard Through. As a result, each city stood alone. As cities grew, they could gain control of the land around them. In this way, they formed cities-states. Each city-state had its own government. She was not part of a larger nation. Historians believe that each city-state was surrounded by a large wall. Sometimes Sumerian city-states fought each other for control of river water, a valuable resource. Every city-state needed an army to protect itself from its neighbors; however, in peacetime they traded with each other. Sumerian people had common ground and they worshiped many gods. This type of belief is called polytheism. Each city-state, however, claimed one god as its own. To honor this god, the city-state built a large temple called zigmurat, a large pyramid-like building with a temple at the top dedicated to the Sumerian deity. The temple is a building used to worship god or many gods. Typical Sumerian city-state, notice ziggurat, the tallest building in the city. People in Schumer were divided into social classes. The upper class included kings, priests, warriors and government workers. The people in this class were powerful and wealthy. The middle class had farmers, fishermen and artisans. It is made of gold leaf, copper, shell, red limestone and lapis lazuli. Unfortunately, the Sumerians didn't spend enough time or money on guns and defense. They conquered Sargon and his people, the Akadians. Ancient Mesopotamia-Babylon and Assyria In order to continue to enjoy our site, please confirm your identity as a person. Thank you very much for your cooperation. Welcome to Block 7: Mesopotamia Early civilizationsIn this unit, students will learn the definition of civilization, which components are impermeable to a successful civilization, and compare this to our lives today. Students will analyze the first civilizations of the river valley and their attitude to success and location. They will look at how geography helps and hinders development. This unit is filled with very important information that will serve as the foundation for the rest of the year. Please work with your child on the vocabulary words for this block as they are critical to their success until the rest of the year. Also, be on the look out for a personalized study of the web path at the end of the block. Students will be given some time in the lesson, but they will have a proper term and will have to complete some of their work at home if necessary. This year, students will cover a total of 15 units. On each tab of the block, you'll have access to all presentations, information, activities, handouts, videos, and more that we also cover in the classroom. This is a critical resource for students and parents to use this school year! When we cover the device, the information will be uploaded to this new website. If you want more unit information or view the topic, please visit my old site: Click here! Thank you for your patience during this transition! Page 3 Students will learn about the different elements that make up the culture! This unit is filled with amazing activities to help students learn about different cultures and connections with their classmates. We begin the unit by analyzing the types of traditions we celebrate that make up our culture. Students will compare their culture to other students around the world. With this unit there is an external project, which is to be held on October 27. Students will use what they learned about the culture to showcase their own culture. Each student will have the opportunity to present their project in a lesson!
